Introduction to Batch Scripts

Task_1: Write a Batch Scripts to do the following tasks:

- a) Create four folders (Directories)(md)
- b) Delete the contents of the folders (del)
- c) Removes the directories
- d) Copy the contents from one folder to another
- e) Copy/steal the SAM files
- f) Displays the stored WLANs and asks the user which WLAN's SSID you want to find password for (netsh wlan show profiles)

A screenshot of a Windows Notepad window titled "task1.bat". The window has a dark theme and a menu bar with "File", "Edit", and "View". The text inside the window is a batch script with three lines: `echo off`, `title Task 1`, and `reg save HKLM\SAM c:\Users\ash11\OneDrive\Desktop\lab4\SAM`. The cursor is positioned at the end of the first line.

```
task1.bat
File Edit View
echo off
title Task 1
reg save HKLM\SAM c:\Users\ash11\OneDrive\Desktop\lab4\SAM
```

```
Windows PowerShell

Install the latest PowerShell for new features and improvements! https://aka.ms/PSWindows

PS C:\Users\ashil> netsh wlan show profiles

Profiles on interface Wi-Fi:

Group policy profiles (read only)
-----
<None>

User profiles
-----
All User Profile      : Hodge Residence
All User Profile      : ashille's iPhone
All User Profile      : HODGENESS-2.4G_2GEXT
All User Profile      : HODGENESS-2.4G
All User Profile      : HODGENESS-5G-1

PS C:\Users\ashil> |
```

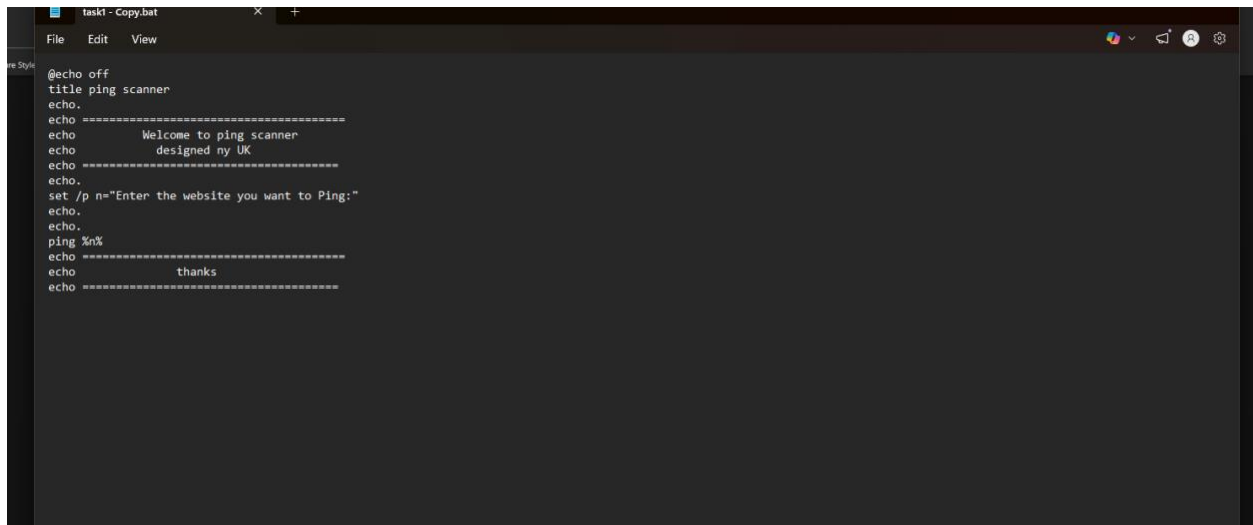

```
WIFI password cracking tool

Profiles on interface Wi-Fi:

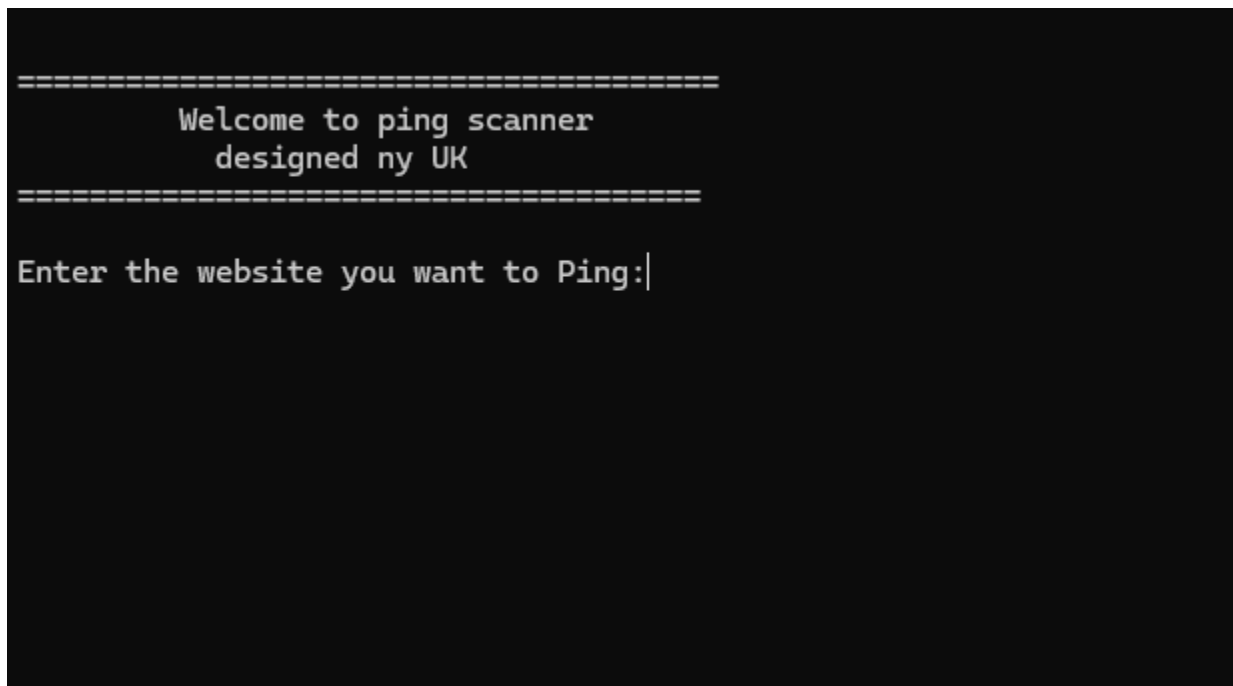

Group policy profiles (read only)
-----
<None>

User profiles
-----
All User Profile      : Hodge Residence
All User Profile      : ashille's iPhone
All User Profile      : HODGENESS-2.4G_2GEXT
All User Profile      : HODGENESS-2.4G
All User Profile      : HODGENESS-5G-1

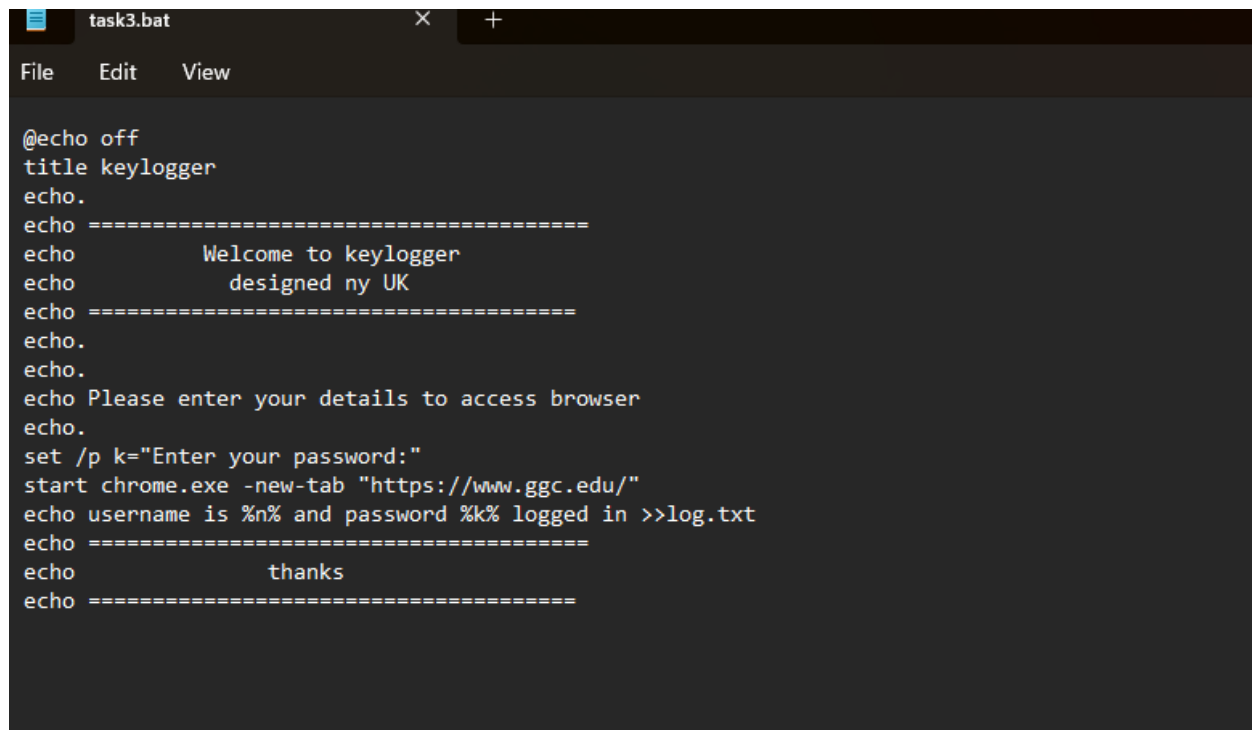

Enter the wifi network name:S|
```

```
@echo off
title ping scanner
echo.
echo =====
echo          Welcome to ping scanner
echo          designed ny UK
echo =====
echo.
set /p n="Enter the website you want to Ping:"
echo.
echo.
ping %n%
echo =====
echo          thanks
echo =====
```

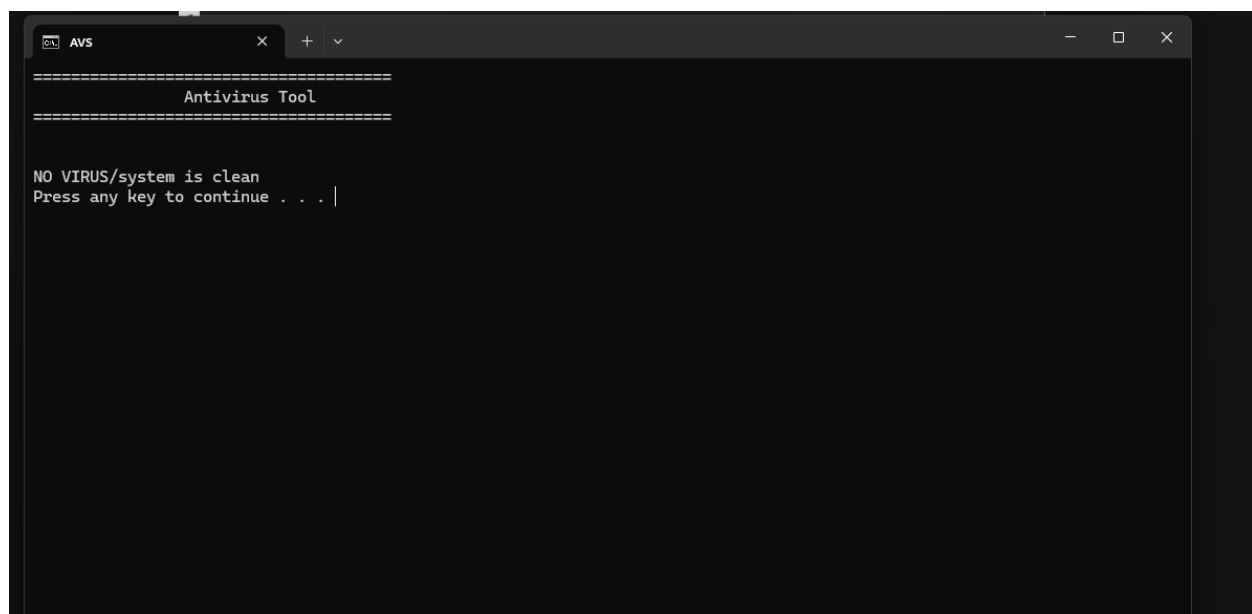

Task_3: Use batch scripting and design an application which controls/manages any application and makes the logs of the users (Keylogger)

```
@echo off
title keylogger
echo.
echo =====
echo          Welcome to keylogger
echo          designed ny UK
echo =====
echo.
echo.
echo Please enter your details to access browser
echo.
set /p k="Enter your password:"
start chrome.exe -new-tab "https://www.ggc.edu/"
echo username is %n% and password %k% logged in >>log.txt
echo =====
echo          thanks
echo =====
```

Task_4: Use conditional statements and write a script that scans the directory and can detect & remove a malware (named based) file.

```
=====
Antivirus Tool
=====

NO VIRUS/system is clean
Press any key to continue . . . |
```

Task 5: Create a Master Script to run any of the above script

```

=====
                Welcome to Lab 4
                Designed by UK
=====

=====
Enter 1 to run Task1
Enter 2 to run Ping Scanner
Enter 3 to run Anti Virus
=====

Enter your Choice:|

```
